

CERT® Survivability and Information Assurance Curriculum

Today's organizations rely on networked systems powered by fast-changing technology. This reliance makes them more vulnerable to attacks and forces system administrators to seek new approaches to computer and network security. To help them, CERT has developed a downloadable three-course curriculum in survivability and information assurance (SIA). This curriculum offers a problem-solving methodology built on key SIA principles that are independent of specific technologies. These principles form the foundation of CERT's SIA Curriculum. A summary of the curriculum is provided below.
